Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

Group I, claim(s) 1-15, drawn to "A method of creating a federation of appliances", classified in class 380, subclass 277

Group II, claim(s) 16-26, drawn to "An introduction device for assigning an appliance to a federation of appliances in a secure manner, with a memory connected to the processor for storing security information the processor communicates with the appliance such that the processor reads the security information from the memory and transmits the security information to the appliance via the proximity based communications port", classified in class 455, subclass 411.

Inventions "A method of creating a federation of appliances" and "An introduction device for assigning an appliance to a federation of appliances in a secure manner, with a memory connected to the processor for storing security information the processor communicates with the appliance such that the processor reads the security information from the memory and transmits the security information to the appliance via the proximity based communications port", are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because "A method of creating a federation of appliances". The subcombination has separate utility such as a memory

connected to the processor for storing security information the processor communicates with the appliance such that the processor reads the security information from the memory and transmits the security information to the appliance via the proximity based communications port.

2. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

A telephone call was made to Mr. Ken Haas at (847) 538-3268 on May 5, 2004 to request an oral election to the above restriction requirement, but did not result in an election being made.
